# AIR & GAS DRYING

## ABSORBANT DESICCANTS

- Available in three grades to meet gas pipeline specifications
- Non-toxic and completely soluble in water
- Used in various types of gas dryers

## HEAT-LESS REGENERATIVE NATURAL GAS DRYER

- Heat-Less Regenerative Natural Gas Dryer
- Reduce H<sub>2</sub>O content to less than
- 4 lbs water / MMSCF

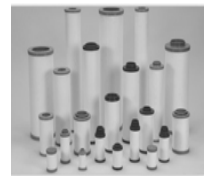

## PIPELINE DRYERS

- Economical solution to natural gas and biogas dehydration
- Environmentally friendly with no BTEX emissions
- Recommended for wellhead, fuel gas, and biogas applications

## GAS FILTRATION

Van Gas Technologies offers a full line of filtration products for gas distribution, desiccant bed protection, regulator stations, instrument gas, and numerous other gas filtration applications.

*Van Gas Technologies specializes in natural gas, fuel gas, and biogas dehydration and filtration. With an emphasis on technological innovation and custom engineering, Van Gas delivers world-class solutions and services that are both cost-effective and environmentally friendly.*
